Summary

I am a graduate student of the State Polytechnic of Malang with the Department of Information Technology from the Diploma IV Informatics Engineering Study Program with a GPA of 3.64 and I have expertise in develop applications and websites in terms of backend and frontend, both of which play an important role in develop the applications in terms of database creation, flow data, and application views. I have a track record as a student who always does assignments quickly and on time. I can also work with tight deadlines, I have good logic skills so that when I implement it into the applications I create. I can understand the flow of data in applications with minimal errors so that during my four years of college, courses related to programming logic got very good marks (A).

Work Experiences

Christian University Hospital of Indonesia – Jakarta (Internship)
January 4th 2021 – February 6th 2021

Working in the IT field at Web Developers in making Hospital Digital Library applications by collaborating with UKI Hospital IT employees in terms of the Frontend and Backend of the application so that the time for making the application can be completed on time for one month and according to the target given by the Hospital Indonesian Christian University General Hospital.

Midas Daya Teknologi - Jakarta (Contract)
November 1st 2021 – June 30th 2023

From November to December, I joined on Oracle Development Center and worked on a project on a core banking product called Flexcube Universal Bank System at Exim Bank and Kasikorn Bank. In the Exim Bank Project, I fixed the return value feature using the java programming language and in the Kasikorn Bank Project I fixed the Flexcube feature in SIT in the Flexcube with RAD Tool.

In mid-January 2022 until January 2023, I was seconded to work on the Bravo project at BFI, in this project I built a financial application using the Java language with the spring boot initializr framework, my jobdesc as a backend java engineer in building services on the API in this application with two different teams (LOS and DMS).

In Mid-January 2023 until now, I was to assign on the Bank Danamon Project for temporarily as a Technical Consultant. In this project I built to technology migration from Java EE to Java springboot and then for February 2023 still analyze depedency and environment what we need in java springboot.

Accord Innovation Indonesia – Jakarta (Contract)
July 3rd 2023 – May 2nd 2024

From July until May 2024, I join in new company in Accord Innovation Indonesia as consultant – Application Support and assigned in client Bank Danamon Indonesia as an Application Support for mobile banking and internet banking Danamon with named DBank Pro Support. My job for support in support related Dbank Pro in Production environment and in every two weeks always implementation object, query/script to deploy production environment

May 3rd 2024 – Now

From May 2024 until now, I join on the new team in Backend Developer. Still on the same client in Bank Danamon Indonesia but in this team, recently I working on BAU Project (Continous Previous Project) and focusly develop in NGI Project (Core Banking Services). And Hopefully I can help team to develop new Project named DbankPro Revamp Project which this project recently started.
